

What is ESIRC?

- ESIRC is the Emporia State Institutional Repository Collection
- ESIRC is an archive, workspace and publishing platform for ESU faculty and students
- ESIRC is a tool for opening up communication and collaboration among learners
- ESIRC is a showcase for scholarly and cultural works created by the ESU community

Why do we need ESIRC?

Powered by MIT's DSpace, ESIRC connects faculty and students at ESU with educators and learners all over the world. ESIRC provides open access to a wide array of academic materials and a growing community of likeminded professionals.

ESIRC provides us with a platform to share our course materials, articles, conference presentations, theses and dissertations, and a host of other important artifacts. ESIRC presents other scholars and the public with clear evidence of our value as professionals, communicates our commitment to learning in a very deliberate and visible fashion, and provides opportunities for feedback and collaboration.

In short, ESIRC facilitates and

archives our contributions to the learning community. ESIRC empowers scholars.

Who can contribute to ESIRC?

All faculty and students affiliated with ESU can contribute to ESIRC. Our goal is to develop an inclusive but robust collection which will represent the work being done at the university. For more details, see our collection development policy at esirc.emporia.edu
