This index is divided into two sections—a subject index and an author-title index. The subject index includes topics, titles of literary works, and names of historic figures, politicians, musicians, and writers discussed in the studies. Many topics refer to Kansas subjects, thus “Kansas” is not used as a subheading. Also, there are very few topics listed under “Kansas” except for “Kansas history.” For other subjects pertaining to Kansas, look directly under that subject.

The numbers in the citations to each study refer to volume number, issue number, and page numbers, in that order. Italicized numbers refer to illustrations, photographs, portraits, or maps found in the issue. For the author and title of the study, see the list of *Emporia State Research Studies* at the back of this publication.

This index was prepared as a joint project by students in Library Science 818—Abstracting and Indexing—during the fall of 1979, under the supervision of their instructor, Linda Schexnaydre. The following students were involved in compiling the index: Gary Fransen, Rosemary Honn, Lou Pointon, Narumon Prajayayothin, David Pribyl, Irple Ruby, and Barbara Wei. David Pribyl assisted in the final editing of the manuscript. Karen Schexnaydre did the filing and provided other editorial assistance.

*Linda Schexnaydre is a member of the faculty of the School of Library Science, Emporia State University.
